Managing the Law

Canadian Business and the Law, now in its 5th edition, has transformed the teaching and learning of business law across the country. Canadian Business and the Law is constructed on the insight that risk management offers the optimal way of dealing with the legal content of business decisions. Beyond this, Canadian Business and the Law provides an engaging pedagogical vision which speaks to the student perspective by emphasizing real life current examples of the business-law interface. For example, the text relies on boxes featuring the impact of the law on Facebook in a variety of contexts including the liability of Facebook for alleged privacy violations, ownership issues relating to Facebook, the firing of employees for Facebook postings, and evidence provided by Facebook photographs leading to the termination of insurance benefits. Canadian Business and the Law offers an innovative and complete learning platform which builds student success.

Hospitality Law: Managing Legal Issues in the Hospitality Industry, Fifth Edition takes an applied approach to the study of hospitality law with its touchstone of compliance and prevention. The book is highly pedagogical and includes many interactive exercises and real world cases that help students focus on the practical application of hospitality laws and model their decision process to avoid liability. As a result, this book does look different than others on the market as the legal information contained is carefully selected to specifically correlate with helping students understand how to do the right thing, i.e., it is not a comprehensive book on the laws. Barth immediately helps readers learn about the legalities of situations and work through exercises -- both individually and in groups -- to effectively apply them to hospitality management situations. Many instructors teach their course from a very applied perspective, which aligns with Barth’s approach.

Business Law 2e is the new edition of a textbook that has been positively launched into the higher education market. The text presents business law principles in a clear and easy-to-understand style. The objective of a business law subject is to ensure that students acquire enough knowledge of the law of business so they can recognise and solve simple legal problems, organise their affairs in order to avoid more complex or serious legal problems, and appreciate the connection of legal principles within a range of commercial environments. As the majority of students are required to study business law as part of either a commerce or business degree, this textbook follows a functional approach to the study of business law rather than doctrinal so the principles of business law are contextualised within a business environment. Business students need to know more than what the law is, they need to know where to find it, how to read it, how to use it and how it impacts on all facets of business. Students who use this textbook will develop a greater awareness of the law and its broad application to business and commercial environments.
