Historical Dictionary of Turkey

One of the keys to learning the Turkish language is to understand the importance and function of the verb. The stem of the verb, together with various suffixes of mode, tense, person, along with a subject and/or object, may be the equivalent of an entire English sentence. A Dictionary of Turkish Verbs is an aid to both the beginning and more advanced student of the language by providing approximately 1,000 verbs in context as they appear in up-to-date colloquial Turkish phrases and sentences, or short dialogues in translation. Contrasting English and Turkish ways of expression, this multipurpose dictionary also helps the English speaker avoid the most common errors—with most verbs cross-referenced to related verbs, synonyms, or antonyms, and to the broader themes or categories of meaning to which they belong. Includes an English-Turkish index and a thesaurus section (using Roget’s categories) where verbs of related meaning appear together and a short reference list of verb-forming suffixes. For students at any stage of learning the Turkish language, or for the self-motivated traveler, this unique dictionary will help open the door to greater understanding in an increasingly important area of the world.

Turkish Dictionary

This dictionary contains 18,500 words in English, Turkish and Arabic with parts of speech identified for each term. It also contains a Arabic transliteration into the Latin Alphabet. It is derived from our WordsRUs system. Turkish (ISO 639-3 tur) also referred to as Istanbul Turkish, is the most widely spoken of the Turkic languages, with approximately 10-15 million native speakers in Southeast Europe (mostly in
East and Western Thrace) and 60-65 million native speakers in Western Asia (mostly in Anatolia). The Turkic family comprises some 30 living languages spoken across Eastern Europe, Central Asia, and Siberia. About 40% of all speakers of Turkic languages are native Turkish speakers. Outside Turkey, significant smaller groups of speakers exist in Germany, Bulgaria, Macedonia, Northern Cyprus, Greece, the Caucasus, and other parts of Europe and Central Asia. Turkey has the 13th largest GDP, well ahead of South Korea, Australia, Canada, and Saudi Arabia. Virtually all the Turkish people are Islamic. Less than 1% of the population is Christian. The Arabic terms are based on Modern Standard Arabic (ISO 639-3 msa). Modern Standard Arabic is a standardized form of Arabic used in business, literature, education, politics, and the media throughout the Arabic speaking world. It's really a modernized form of classical Arabic, and it is not the same language as the spoken varieties found from Morocco to Iraq, but it's a good form of Arabic to familiarize yourself with as a tourist, because it is used as a common language in Arab countries.

This dictionary contains 20,000 English (eng) terms paired with Turkish (tur) and Northern Kurdish (kmr). It is extracted from our WordsRUs multi-lingual data base which is built on Princeton Wordnet of the English language. Turkish, Arabic, Kurdish, Italian and other language pairs are available. Visit our website at www.wordsrus.info for availability of the other volumes. Turkish (ISO 639-3 tur) also referred to as Istanbul Turkish, is the most widely spoken of the Turkic languages, with approximately 10-15 million native speakers in Southeast Europe (mostly in East and Western Thrace) and 60-65 million native speakers in Western Asia (mostly in Anatolia). The Turkic family comprises some 30 living languages spoken across Eastern Europe, Central Asia, and Siberia. About 40% of all speakers of Turkic languages are native Turkish speakers. Outside Turkey, significant smaller groups of speakers exist in Germany, Bulgaria, Macedonia, Northern Cyprus, Greece, the Caucasus, and other parts of Europe and Central Asia. The characteristic features of Turkish, such as vowel harmony, agglutination, and lack of grammatical gender, are universal within the Turkic family. After the foundation of the modern state of Turkey the Turkish Language Association (TDK) was established in 1932 under the patronage of Mustafa Kemal Atatürk, with the aim of conducting research on Turkish. One of the tasks of the newly established association was to initiate a language reform to replace loanwords of Arabic and Persian origin with Turkish equivalents. By banning the usage of imported words in the press, the association succeeded in removing several hundred foreign words from the language. While most of the words introduced by the TDK were newly derived from Turkic roots, it also opted for reviving Old Turkish words which had not been used for centuries. The past few decades have seen the continuing work of the TDK to coin new Turkish words to express new concepts and technologies as they enter the language, mostly from English. Many of these new words, particularly information technology terms, have received widespread acceptance. However, the TDK is occasionally criticized for coining words which sound contrived and artificial. Many of the words derived by TDK coexist with their older counterparts. Turkey has the 13th largest GDP, well ahead of South Korea, Australia, Canada, and Saudi Arabia. Virtually all the Turkish people are Islamic. Less than 1% of the population is Christian. Kurdish forms three dialect groups known as Northern Kurdish (Kurmanji), Central Kurdish (Sorani), and Southern Kurdish (Paleswani). A separate group of non-Kurdish Northwestern Iranian languages, the Zaza-Gorani languages, are also spoken by several million Kurds. Northern Kurdish (Kurmanji) is spoken in Turkey, Syria, northern Iraq and northwestern Iran by about 15-20 million people. Studies as of 2009 estimate between 8 and 20 million native Kurdish speakers in Turkey. The majority of the Kurds speak Northern Kurdish ("Kurmanji"). Before August 2002, the Turkish government placed severe restrictions on the use of Kurdish, prohibiting the language in education and broadcast media. The Turkish alphabet is not recognized in Turkey, and the use of Kurdish names containing the letters X, W, and Q, which do not exist in the Turkish alphabet, is not allowed. In 2012, Kurdish-language lessons became an elective subject in public schools. Previously, Kurdish education had only been possible in private institutions. Because of war in their homeland, many Kurds have become refugees in Iran, Iraq, Turkey and Germany. Other groups are found elsewhere. The United States currently has a significant population of native Kurdish speakers as does France and the U.K. Virtually all of the Kurdish people are Islamic.
